

Citizens Climate Campaign

creating the political will to deal with climate change

The campaign gives ordinary people all over Australia an easy way to send short messages, **by email or letter**, to let our politicians know we want **real leadership** and **much stronger policies** to urgently address the threat of climate change.

**Find out more about the campaign and sign on at
www.climatecampaign.info**

As important issues arise concerning climate change, we will send you a short email with a little background information and a link to a prepared email addressed to the appropriate politician. You can add a message of your own if you wish. Contact details for writing a letter will also be given.

Join over a thousand Australians who have already signed on.

This is a numbers campaign. Enrol your friends and networks.
